

**Extensive testing results...**

## **Jonsson Shrimp Peeling Systems proven better than hand peeling.**

Recently, an interested, but also skeptical prospect, visited our plant to test peel 500 lbs. of their shrimp, with their personnel operating the machines. They wanted to determine if the yield of perfectly-peeled shrimp met their very stringent requirements.

Result? The interested processor was so impressed with the quality and yield of the finished product, they have now installed a highly automated, high-volume Jonsson Peeling System capable of peeling 35,000 shrimp per hour.

***Individual shrimp processing is the key to high quality.***

Jonsson Systems are equipped with advance-design Model 60

machines that peel any shrimp — wild or cultured — almost any way you want, a total of seven different styles. After the operator places the shrimp in the tray, the rest of the process is automatic. The machine adjusts to each shrimp, gently peeling and deveining it in the style selected.

### ***Faster, Better, Cheaper!***

10 times faster than hand peeling, the systems move shrimp to further production steps quickly, minimizing time and temperature abuse. Shrimp are cleaner because there's far less handling, resulting in less contamination, lower bacteria counts and a superior quality product. Since the systems require far less labor, direct and indirect labor costs are greatly reduced.

### ***Get the facts.***
