

Pond and Tank Liners

By Reef Industries, Inc.

For over 50 years, the Aquaculture Industry has relied on Reef Industries to provide a cost-effective and durable liner for lining ponds, lagoons and raceways. Our high-density polyethylene product will withstand punctures in the most demanding conditions, ensuring adequate water retention. Reef membranes can be custom fabricated to meet your project specifications.

SPECIAL FEATURES

- Alloyed high-density polyethylene resists punctures and tears for a more secure system.
- Lightweight and easy to handle for quick, easy, installation.
- UV stabilized for durability during extended exposure to the elements.
- Cold crack tested to -60°F for continuous performance in extreme temperatures.
- Custom engineered fabrication and sizes up to an acre available to minimize infield seaming.
